

SUPPORTING PUPILS WITH MEDICAL CONDITIONS/ NEEDS POLICY

To enable every individual regardless of ability to achieve their full potential, to prepare for future life and to become life long learners, developing a thirst for learning and to become good citizens equipped for the challenges of the 21st century.

Our motto is - **It's fun to learn**

The values that underpin this vision can be set out under the following headings.

To Develop An Understanding Of Self

Each child should be guided to

- Develop an appreciation and awareness of self
- Become independent learners and thinkers
- Achieve their fullest potential regardless of their ability and gender
- Have high personal expectations of work and behaviour
- Have a positive attitude towards their own learning
- Show a healthy attitude to living an active life through sport and other recreational activities

To Develop An Understanding Of Relationships

Each child should

- Care for others and oneself
- Show mutual respect and tolerance for spiritual and cultural diversity
- Understand the importance of learning together and working together as a team

To Develop An Understanding Of Society

Each child should endeavour to become

- Good citizens
- Effective and constructive members of the community
- Able to appreciate and celebrate their own and others success
- Valuable members of the school community

To Develop An Understanding Of The Environment

Each child should

- Take an active role in caring for the learning environment of the school
- Be safe and cared for in a stimulating learning environment
- Appreciate and respect the environment of the school

Through exposure to a wide range of teaching and learning experiences, pupils will achieve their full potential as independent, THINKING learners. Relevant, enjoyable and enriching activities will develop their thirst for life-long learning.

As a school our belief is that every child deserves to succeed regardless of his or her ability.

Many pupils will, at some time have a medical condition that may affect their participation in school activities, for some this will only be short term. Other pupils may have medical conditions, if not properly managed, could limit their access to education. These are regarded as having Medical Needs.

Most pupils with medical needs are able to attend school regularly and with some support from the school, take part in most normal school activities. School staff may need to exercise extra care in supervising some activities, to ensure that these pupils with medical needs and others are not put at risk.

Governing Body

- Has general responsibility for all school policies
- Will generally want to take account of the views of the Headteacher, the staff and parents/carers in developing a policy on assisting pupils with medical needs
- We follow the Health and Safety policies and procedures produced by the education authority
- Should ensure that written records are kept of all medicines administered to children

Parents/Carers

- It is the parent's/carer's responsibility to make sure that their child is well enough to attend school. If the child is unwell, the parents should keep the child at home
- Parents/carers should provide sufficient information about their child's medical condition, treatment and/or special care needed at school and letting the school know of any changes to the prescription or the support needed
- By completing the initial admission form or the medical consent form, the school will only give information about the pupil's health to staff on a need to know basis
- Ensure that medication is in date, clearly labelled - on medication itself this should include: name of child, name of medication, dose and frequency.
- Ensure that the medication is provided in the original container as dispensed by the pharmacist and includes the instructions for administration, dosage and storage. An exception is for insulin, as the child will bring in their own insulin every day and take it home at the end of the day
- It is the responsibility of the parent/guardian to ensure that their child's medication is in date.

The School

- The school's designated person is Catherine Page, Headteacher who works closely with the SENCo (Miss Amanda McArdle), Mrs Christine Durant, First Aid Officer for KS2 and Shona Jenkins, First Aid Officer for KS1.
- The designated person is responsible for ensuring that willing staff have appropriate training to support pupils with medical needs which is updated when required. Training is provided by the school nurse team on epi-pen, asthma, diabetes, epilepsy. Training for other medical needs ie: cystic fibrosis and acute diabetes can be obtained from other HC professionals.
- All staff are expected to use their best endeavours at all times, particularly in emergencies
- The school must make sure that correct procedures are followed, keeping accurate records for each child and each incident and liaise with parents accordingly
- The Headteacher should make sure that staff follow the school's documented procedure, following guidance from the education authority, they should be fully covered by their employer's public liability insurance should a parent make a complaint
- An INDIVIDUAL HEALTH CARE PLAN can also help schools to identify the necessary safety measures required to support pupils with medical needs if and when required (recommend medical conditions at school health care plan available from: www.medicalconditionsatschool.org.uk)

School Staff (Teaching and Non-teaching)

- Teachers who have pupils with medical needs in their class should understand the nature of the condition and when and where the pupil may need extra attention
- Staff should be aware of the likelihood of an emergency arising and what action to take if one occurs
- Back-up cover should be arranged for when the member of staff responsible is absent or unavailable and should ensure that those covering are made aware of the medical need
- At different times of the day other staff may be responsible for pupils (i.e.; Lunchtime controllers and cover staff). It is important that they are given an information session. However, each class will have a member of staff trained in dealing with diabetes, epilepsy and epi-pens and the school has two named First Aiders. All teachers take part in First Aid training which is updated every three years.
- If staff notice a deterioration in a pupil's health over time (or changes to regular routine), they should inform the class teacher, who should in turn inform the parents/carers

Administering Medication

- Any member of staff who agree to accept responsibility for administering prescribed medication to a pupil should have proper training and guidance and should check the following: -
 1. The pupil's name
 2. Written instructions provided by parents or doctor
 3. Prescribed dose and frequency
 4. Expiry date
- He or she should be aware of possible side effects of the medication and what to do if they occur
- School staff should generally not give any non-prescribed medication to pupils i.e. aspirins, paracetamol. **A child under 12 should never be given aspirin, unless prescribed by a doctor.** If a pupil suffers from acute pain i.e. Migraine, the parents should authorise and supply appropriate painkillers, with written instructions on administering the medication. A member of staff should supervise the pupil taking the medication and notify the parents, in writing, on the day painkillers are taken
- The school holds separate policies for Asthma and Severe Allergic Reaction (Anaphylaxis).
- No pupil under 16 should be given medication without his/her parents written consent
- It is good practice to have the dosage and administration witnessed by a second adult
- It is good practice to allow pupils who can be trusted to manage their own medication from a relatively early age (parents should state this on health care plan). If doing so, staff should supervise them at all times
- If a pupil refuses to take medication, staff should not force them to do so. The school should inform the parent as a matter of urgency, and if necessary, call the emergency services
- Some medicine needs to be refrigerated. Medicines can be kept in a refrigerator containing food, **but should be in an airtight container and clearly marked**
- Medicines will be stored safely but accessible to those it is prescribed for.
- Parents/carers should collect medicines held at school and are responsible for the disposal of date expired medication

There is no legal duty which requires school staff to administer medication, this is a voluntary role.

Hygiene/Infection Control

- All staff should be familiar with normal precautions for avoiding infection and must follow basic hygiene procedures
- Staff should have access to protective disposable gloves and take care when dealing with spillages of blood or other body fluids and disposing of dressings or equipment

Emergency Procedures

- All staff should know how to call the emergency services
- All staff should know who is responsible for carrying out emergency procedures in the event of need
- A pupil taken to hospital by ambulance should be accompanied by a member of staff who should remain until the pupil's parents/carer arrives
- Generally, staff **should not** take pupils to hospital in their own cars. However, in an emergency it may be the best course of action. That member of staff **should be accompanied** by another adult and have public liability vehicle insurance i.e., for business use
- A copy of the health care plan should accompany the child to A&E with prior parental permission

School Trips

- It is good practice for schools to encourage all pupils to participate in school trips whenever safety permits
- Staff supervising excursions and overnight trips should always be aware of any (additional) medical needs and relevant emergency procedures
- It may be advisable/appropriate for an additional supervisor or parent/carer to accompany a pupil with particular medical needs.

Sporting Activities

- Most pupils with medical conditions can participate in extra-curricular sport or in the PE curriculum, which is sufficiently flexible for all pupils to follow in ways appropriate to their own abilities
- For many, physical activity can benefit their overall social, mental and physical health and well-being
- Some pupils may need to take precautionary measures before or during exercise and-or need to be allowed immediate access to their medication, if necessary
- Staff supervising sporting activities should always be aware of any medical needs and relevant emergency procedures. A generic first aid box should accompany a class when away from the classroom for an outside activity, along with the **class** first aid box containing individual children's medications eg; asthma medications and epi-pens.
