

## Key Aim

By the end of this topic, pupils will be able to describe the functions of different types of teeth and name key parts of the human digestive system.

Teeth	Hard, bony structures in our mouth used to eat.
Canine	Sharp tooth, used for ripping and tearing food.
Molar	Flat tooth, used for crushing food.
Incisor	Tooth used for biting and chewing food.
Digestion	The process of food entering our body .
Intestines	Two organs that store and filter parts of the food that we eat.
Excretion	The process of waste exiting our body.

Hopefully, you visit your dentist regularly. What is their name and what questions might you ask them next time you go?

We will learn about the different types of teeth and how food travels through our digestive system.
